Rhythm & Wave is dedicated to provide quality music education, our courses are structured to be relevant to the needs of individual learners, who may wish to work in the developing music industry as a performer, arranger or composer, or to pursue a personal interest.

## topics covered

- Proper warm-up techniques, breath control and posture
- Aural training, pitching and intonation
- Vocal conditioning and preservation
- Gradual blend between vocal registers e.g. chest to head voice
- Developing natural richness of one's voice and tone quality
- Melodic leaps, key changes and challenging intervals
- Variety of dynamics, articulation, phrasing and tone colour
- Building vocal agility, projection and power
- Physical and expressive techniques e.g. vibrato, falsetto, vocal fry
- Overcoming vocal faults and extend vocal range
- Song interpretation and vocal improvisation
- Communicating style and emotions
- Advanced tonal control and microphone technique
- Clear diction across a range of styles and genres
- Complex vocal effects and techniques e.g. note bends, runs

With proper vocal techniques and balanced tone production, students should be able to perform confidently and execute pieces with fluency and consistency as well as effective communication of mood and musical personality.

Students will also be provided performing opportunities through bi-annual showcase, demo recording master classes and other events so as to gain the necessary exposure, build self-confidence and enhance learning experience at Rhythm & Wave.
